Work experience

2020-2023 – Bausch & Lomb Inc. – QA Software Engineer

Bausch + Lomb, a renowned American company specializing in the manufacture of contact lenses, lens care solutions, ophthalmic surgical instruments, pharmaceuticals, and various opto-mechanical products.

Main responsibilities:

- Analyzed project specifications, optimizing development processes resulting in the successful launch of the company's website, and a website and mobile application for the loyalty program, reduced development time by 15%.
- Decreased test execution time for UI on 20% by optimizing test-suites using test design techniques;
- Regularly reported identified issues via Jira, decreasing issue resolution time by 30%.
- Provided in-depth analysis of testing results, decreased edit interactions for test documentation twice by reviewing test-suites for major web app modules written by junior colleagues and conducting one-to-one meetings for providing feedback and support.
- Actively participated in daily stand-ups and sprint planning, improving communication and reducing project planning time.
- Leveraged TestRail for streamlined test case management.
- Conducted API testing via Postman, enhancing testing accuracy by 20% over six months.
- Tested mobile applications using Android Studio and Xcode.
- Collaborated effectively with cross-functional teams within the Digital Marketing department, including web developers, designers, product and marketing teams improving product release timelines.
- Led the onboarding of junior-level employees.
- Regularly achieved all quarterly targets and consistently exceeded personal plans by a minimum of 10%.
- Played a major role in enhancing digital products by reviewing user interfaces, functionality, and overall user satisfaction.

2018-2020 – Konig Labs – QA Software Engineer

Konig Labs is a digital solutions agency specializing in the development of software and web applications for a wide range of clients.

Main responsibilities:

- Examined project specifications through requirement analysis and identified potential areas for improvement.
- Performed thorough functional and non-functional testing within rapidly evolving project requirements.
- Reported bugs and issues using Jira, meticulously tracking them until resolution.
- Provided in-depth analysis based on testing results and executed comprehensive regression and smoke tests.
- Collaborated seamlessly with cross-functional teams, fostering an environment of shared knowledge and best practices.
- Actively engaged with stakeholders and clients, integrating feedback to enhance project deliverables.
- Demonstrated strong communication skills during active participation in discussions, presentations, and proposing enhancements.
- Displayed the ability to make informed decisions related to technical solutions, priority management, and task delegation.
- Efficiently managed project schedules, ensuring adherence to 100% feature deadlines by resolving obstacles.
- Oversaw the entire development process, ensuring successful project outcomes and maintaining product quality standards.
- Implemented Scrum methodology on the project, replacing a waterfall approach, resulted in resource savings for the team and accelerated project delivery by 10 days.
- Successfully reorganized the testing process from a tabular system to test management and bug tracking systems.
