- **UI Testing:** PixelPerfect, Chrome DevTools, Browserstack.
- **Performance Testing:** JMeter.
- **Mobile Testing:** XCode, Android Studio.
- **Automation Testing:** Selenium WebDriver, Python, PyTest, and UnitTest.
- **Other tools:** PyCharm, Charles Proxy, Fiddler, Notion, Figma, Miro, Slack, Discord, Zoom, MS Office.

Work experience

2020-2023 – Bausch & Lomb Inc. – QA Software Engineer

Bausch + Lomb, a renowned American company specializing in the manufacture of contact lenses, lens care solutions, ophthalmic surgical instruments, pharmaceuticals, and various opto-mechanical products.

Main responsibilities:

- Analyzed the technical specifications of projects, was responsible for conducting End-to-end functional and non-functional testing, which led to the successful launch of the company's website and mobile application (iOS and Android).
- Immediately reported identified problems through Jira to promptly resolve defects and bugs.
- Provided in-depth analysis of testing results, analyzed feedback and overall satisfaction of stakeholders, product owners and software users.
- Managed the onboarding and reviewed test suites for core web application modules written by Junior QA engineers and conducted one-on-one meetings to provide feedback and plan for growth.
- Actively participated in daily stand-ups and sprint planning.
- Provided software database testing using SQL queries.
- Used TestRail for test case management.
- Conducted API testing via Postman and Swagger for full backend testing.
- Tested mobile applications using Android Studio and Xcode.
- Conducted user interface and performance testing using emulators and simulators (browserstack, chrome devtools, JMeter, etc.).
- Conducted accessibility audits for projects according to WCAG 2.1 AA standards, using various web-tools such as VoiceOver, Accessibility Web-Inspector, Landmarks, etc. Verified contrast, control elements, focus, alternative text, and adaptation for screenreaders.
- Collaborated effectively with cross-functional Digital Marketing teams including web developers, designers, product and marketing teams to improve communication and meet product release deadlines.
- Implemented automated tests for regular smoke and regression testing of software functionality using Selenium and Python, prepared user interface test suites using test design techniques;
- Regularly achieved personal quarterly goals for releasing projects into production and consistently exceeded personal goals by at least 10%.

2018-2020 – Konig Labs – QA Software Engineer

Konig Labs is a digital solutions agency specializing in the development of software and web applications for a wide range of clients.

Main responsibilities:

- Examined project specifications through requirement analysis and identified potential areas for improvement.
- Performed thorough functional and non-functional testing within rapidly evolving project requirements.
- Reported bugs and issues using Jira, meticulously tracking them until resolution.
- Provided in-depth analysis based on testing results and executed comprehensive regression and smoke tests.
- Collaborated seamlessly with cross-functional teams, fostering an environment of shared knowledge and best practices.
- Actively engaged with stakeholders and clients, integrating feedback to enhance project deliverables.
- Demonstrated strong communication skills during active participation in discussions, presentations, and proposing enhancements.
- Displayed the ability to make informed decisions related to technical solutions, priority management, and task delegation.
- Efficiently managed project schedules, ensuring adherence to 100% feature deadlines by resolving obstacles.
- Oversaw the entire development process, ensuring successful project outcomes and maintaining product quality standards.
- Implemented Scrum methodology on the project, replacing a waterfall approach, resulted in resource savings for the team and accelerated project delivery by 10 days.
- Successfully reorganized the testing process from a tabular system to test management and bug tracking systems.
