Additional information

Work Authorization: I'm legally authorized to work in the US without restriction and I don't require visa sponsorship or a visa transfer.

Professional interests: Reading of professional books and Web-sources (articles, professional courses, YouTube, Stackoverflow etc.), learning English

Reason for applying for a job

My experience as a Project Manager has instilled in me a strong appreciation for quality and a deep understanding of project dynamics. While excelling in project management, I realized my passion for ensuring product quality. The precision and attention to detail required in manual testing align with my skills and interests, making me well-equipped to contribute effectively in QA software testing roles.

Furthermore, I have actively engaged in QA software testing during my previous roles, where I conducted test case creation, execution, and bug tracking. My hands-on experience in identifying, reporting, and resolving software defects has honed my ability to ensure product reliability and performance, reinforcing my commitment to maintaining high standards of quality throughout the software development lifecycle.
