Specialization: Finances and credit

Work experience

2020-2023 – Bausch & Lomb Inc. – QA Software Engineer

Bausch + Lomb, a renowned American company specializing in the manufacture of contact lenses, lens care solutions, ophthalmic surgical instruments, pharmaceuticals, and various opto-mechanical products.

Main responsibilities:

- Analyzed project specifications, optimizing development processes resulting in the successful launch of the company's website, and a website and mobile application for the loyalty program, contributing to a 15% reduction in development time.
- Conducted comprehensive functional and non-functional testing, ensuring high-quality delivery of the company's digital products, leading to a 20% decrease in critical errors.
- Regularly reported identified issues via Jira, decreasing issue resolution time by 30%.
- Provided in-depth analysis of testing results, contributing to a 25% increase in overall product reliability within a year.
- Actively participated in daily stand-ups and sprint planning, improving communication and reducing project planning time.
- Utilized JMeter and Chrome DevTools to optimize server checks and responsiveness.
- Leveraged TestRail for streamlined test case management.
- Conducted API testing via Postman, enhancing testing accuracy by 20% over six months.- Tested mobile applications using Android Studio and Xcode.
- Collaborated effectively with cross-functional teams within the Digital Marketing department, including web developers, designers, product and marketing teams improving product release timelines.
- Played a serious role in enhancing digital products, contributing to the improvement of user interfaces, functionality, and overall user satisfaction.

2018-2020 – Konig Labs – QA Software Engineer

Konig Labs is a digital solutions agency specializing in the development of software and web applications for a wide range of clients.

Main responsibilities:

- Examined project specifications through requirement analysis and identified potential areas for improvement.
- Performed thorough functional and non-functional testing within rapidly evolving project requirements.
- Reported bugs and issues using Jira, meticulously tracking them until resolution.
- Provided in-depth analysis based on testing results and executed comprehensive regression and smoke tests.
- Collaborated seamlessly with cross-functional teams, fostering an environment of shared knowledge and best practices.
- Actively engaged with stakeholders and clients, integrating feedback to enhance project deliverables.
- Demonstrated strong communication skills during active participation in discussions, presentations, and proposing enhancements.
- Displayed the ability to make informed decisions related to technical solutions, priority management, and task delegation.
- Efficiently managed project schedules, ensuring adherence to 100% feature deadlines by resolving obstacles.
- Oversaw the entire development process, ensuring successful project outcomes and maintaining product quality standards.
